

01 - The minister is dead

The minister is dead
Did you see it on the TV
Did you hear it on the radio
And do you care what so ever

Did he attack our society
Or did he just kill one person
Did he just raise editions
By taking a famous life

It was featured on primetime
We take interest in one life
We buy popcorn and hide
Under the blanket
Ignoring the death of a five year old kid

And everyone who cried
I'm sure most didn't know her
I'm sure most never saw her
But just caved in to the pressure
But the editors felt joy

Now they could sell their papers
And we bought what could be bought
About the minister's death
The minister is dead
The minister is dead

The minister is dead
Did you see it on the TV
Did you hear it on the radio
And do you care what so ever

02 - Horror tin can

My brain paths are changing
So I can keep on breathing
I'm lost in a horror tin can
I've killed more men than I can count

Still alive in the third world war
I can't remember a spring so cold
Before I was a peaceful man
But no one aims as I can

I am running out of gas soon
In the desert heat that's so cruel
My commander is George W
His blood's on my hands and yours too

Praise Jesus with a nuclear birth
As god returns back hell to earth
And no Nohas ark was ever built
Except NORAD that was filled with filth

I'm running out of gas soon
I expect to die before noon

03 - Israeli "security" fence

04 - Suicide²

I watch your steps
We just let go
We fall to the concrete
As we fall off this world

We're falling in love
We're falling in love
I watch you fall
I watch you fall

Your beautiful mind
You're so beautifully mine
Think for me now
Think of me now

It to late to change our plans
It to late to feel regrets
We're up in the air so far
The ground's getting closer
It's your suicide too
It's your suicide too
And not just mine

I watch you fall
In peaceful sleep
Dream for me now
Dream of me now

05 - Third strike

I pass from you
Apart from you
No single light
No tunnel bright

06 - The much needed second cold war

My life's a little bit harder now
I'm working part time
So I'll get by
But there's less of everything it seems
And it's no fun

Next year I'll try another life
Next year I'll ask for more
But next year is just another year
Of the much needed second cold war

I am a little more controlled now
I make no trouble
So I'll get by
But there's fear in everything I see
And I'm no fun

Next year I'll try another life
Next year I'll ask for more
Next year is just another year
Of the much needed second cold war

Next year I'll try another life
Next year I'll ask for more
Next year is just another year
Of the much needed second cold war

07 - Cold Anger

Your voice is dead
As I to you
I couldn't be there
When I was there it was never enough

A chill within
My frozen heart
My chest is open

You just never closed it on your way out

I surely wish you were our
I surely wish you were gone

Can't see past tomorrow
Can't see the end of this

Anger soaks through me
Anger through filthy me
'Cause I can't do
What I don't do
Anger

Anger, speak to me
Anger to filthy me
Cause I can't do
What I don't do
Anger

I sleep alone
I eat alone
When I go out I go away and
I come back to your home

With open hate
I crawl along
I get along with your world
Hoping I wont be here to long
I never stay here to long

Can't see past tomorrow
Can't see the end of this

Anger soaks through me
Anger through filthy me
'Cause I can't do
What I don't do
Anger

Anger, speak to me
Anger to filthy me
Cause I can't do
What I don't do
Anger

08 - I never went to the English beach house

Is this my own
Is this my own
Life west coloured
Or maybe lighthouse white
Could they be twins
Could they be twins
Wet as your skin
And surely wet as mine

Spoke to you
So grey today
But you will never know
You will never know
They died so
Many years ago
But you will never know
You will never know

Spoke to you
So grey today
But you will never know
You will never know

Do edges glow
Do edges glow
Firemen fighting
Where someone torched a house
Could we be friends
Could we be friends
Soft as your lips
But never soft as mine

09 - Suicide

I'm darker than ever
I'm close to pathetic
My life's getting duller
And slips into nothing
I'm colder and emptier
I'm closer to nothingness
My words and my thoughts are all gone

And the happier songs
That I wrote in another life

Were never so happy as I think of them now
They were close to depression
No I sink in this black hole
I'm darker than ever and that's all mine

I'm calmer than ever
I'm close to perfection
The edge's getting nearer
And slips into my wrist
I'm colder and emptier
And further from tears
My life in the mirror of me

And the happier life
That I lived in another time
Was never so happy
As I think of it now
The room's getting darker
My conscience is slipping
I'm happier than ever
And that's all mine

Lift my face
And stare me to life again
Let go and I turn into night

10 - American torture

Every little sleepy child
British Petroleum
Go to bed and dream a while
Guatemala
Hug you fluffy
Kongo
Teddy bear
Korea
Smile all night without fear
Vietnam
Afganistan
You are
Arabs in dresses
Secure
The future
American torture
Of the free world

11 - Disease

This is your last chance
'Cause you are so fucked up

This is the last hour
Before I send you away
Or I wish I could

Your sweetness disgusts me
Made me crawl for you

Your skin makes me weaker
Your sweetness disgusts me
Made me crawl for you

You are my mental disease
That always stays in my mind

Your skin makes me weaker
Can't clear the smudge away
Or maybe tomorrow

Crushed into pieces
Made me hate you more

Take off that dress
And disappear

Crushed into pieces
Made me hate you more

12 - Abuse

So you're in a bad mood
And you feel frustrated
And got reasons to kill for
I'm sorry
You hunt me down
You hunt me down

You hurt me
You hurt me
You hurt me
You hurt me
I'm sorry
Don't hurt me no more

You hunt me down
So you're in a bad mood
You hunt me down
You take it out on me again

13 - I'll Begin

I say tomorrow
When the wind has calmed
And the flood has dried out
I will do no more harm

I say tomorrow
When my life is saved
That I'll do better
I will do better

And I'm afraid now
That this fear will pass
And when I rebuild my life
I will forget, I will forget

That I'll begin
That I'll begin
That I'll begin
I shall begin

I say tomorrow
When the wind has calmed
And the storm moved further
Never did no more harm

I'll begin oh I'll begin
